☒ Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2016.

Section 1— Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

This Form SD of Fortive Corporation (the “Company”) is filed pursuant to Rule 13p-1 (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended, for the reporting period January 1, 2016 to December 31, 2016.

A copy of the Company’s Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD, and is publicly available at www.fortive.com under the “Investors” caption.

Rule 13p-1 (the “Rule”) requires disclosure of certain information when a company manufactures or contracts to manufacture products for which the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals are gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, which are limited to tantalum, tin and tungsten (the “Conflict Minerals”). The “Covered Countries” for the purposes of the Rule are the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola. Certain of the Company’s operations manufacture, or contract to manufacture, products for which the Conflict Minerals are necessary to the functionality or production of those products.

The Company has conducted a reasonable country of origin inquiry regarding the Conflict Minerals. This inquiry was reasonably designed to determine whether any of the Conflict Minerals originated in the Covered Countries and whether any of the Conflict Minerals may be from recycled or scrap sources. The Company’s reasonable country of origin inquiry was part of its due diligence on the source and chain of custody of the Conflict Minerals.

Based on this reasonable country of origin inquiry, the Company has reason to believe that certain of its necessary Conflict Minerals may have originated in the Covered Countries and are not from recycled or scrap sources. The Company’s due diligence on the source and chain of custody of the Conflict Minerals, including its efforts to determine the countries of origin of the Conflict Minerals, are described in the Company’s Conflict Minerals Report.

Item 1.02 Exhibit

As specified in Section 2, Item 2.01 of this Form SD, the Company is hereby filing its Conflict Minerals Report as Exhibit 1.01 to this report.

Section 2 — Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this report.

<u>Exhibit No.</u>	<u>Description</u>
1.01	Conflict Minerals Report of Fortive Corporation.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

FORTIVE CORPORATION

EXHIBIT INDEX

<u>Exhibit No.</u>	<u>Description</u>
1.01	Conflict Minerals Report of Fortive Corporation.

Fortive Corporation
Conflict Minerals Report
For the reporting period from January 1, 2016 to December 31, 2016

This Conflict Minerals Report (the “Report”) of Fortive Corporation (the “Company”) has been prepared pursuant to Rule 13p-1 and Form SD (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended, for the reporting period January 1, 2016 to December 31, 2016.

The Rule requires disclosure of certain information when a company manufactures or contracts to manufacture products and the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals, which we collectively refer to in this Report as the “Conflict Minerals,” are gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, which are limited to tantalum, tin and tungsten. The “Covered Countries” for the purposes of the Rule and this Report are the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola.

Description of the Company’s Products Covered by this Report

This Report relates to products: (i) for which Conflict Minerals are necessary to the functionality or production of that product; (ii) that were manufactured, or contracted to be manufactured, by the Company; and (iii) for which the manufacture was completed during calendar year 2016. These products, which are referred to in this Report collectively as the “Covered Products,” consist of professional and engineered products in our Professional Instrumentation and our Industrial Technologies business segments.

Reasonable Country of Origin Inquiry

The Company has conducted a reasonable country of origin inquiry, or RCOI, regarding the Conflict Minerals. This inquiry was reasonably designed to determine whether any of the Conflict Minerals originated in the Covered Countries and whether any of the Conflict Minerals may be from recycled or scrap sources. The Company’s supply chain with respect to the Covered Products is complex, and there are many third parties in the supply chain between the ultimate manufacturer of the Covered Products and the original sources of Conflict Minerals; the Company does not purchase Conflict Minerals directly from mines, smelters or refiners. The Company must therefore rely on its suppliers to provide information regarding the origin of Conflict Minerals that are included in the Covered Products. Moreover, the Company believes that the smelters and other refiners (“smelters”) of the Conflict Minerals are best situated to identify the sources of Conflict Minerals, and therefore has structured its RCOI and due diligence processes to ultimately identify the applicable smelters of Conflict Minerals in the Company’s supply chain. Due to the overlap between the supplier/smelter RCOI and supplier/smelter due diligence processes, the supplier/smelter RCOI processes are summarized in the due diligence section of this Report.

Based on the RCOI, the Company has reason to believe that certain of its necessary Conflict Minerals may have originated in the Covered Countries and are not from recycled or scrap sources.

Due Diligence

The Company designed its due diligence process to conform with the Organization for Economic Cooperation and Development’s (“OECD’s”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and accompanying Supplements as applicable for downstream companies (the “OECD Guidance”). In accordance with the OECD Guidance five-step framework, we undertook the following due diligence measures.

The Company established strong management systems according to Step 1 of the OECD Guidance. The Company's systems included the following:

- Step 1A: Policy. The Company adopted a policy related to the Conflict Minerals (the "Company Policy"), incorporating the standards set forth in the OECD Guidance. The policy states the Company's commitment to sourcing components and materials from companies that share its values regarding respect for human rights, integrity and environmental responsibility and complying with the OECD Guidance and Section 1502 of the Dodd-Frank Act. The Company Policy also provides that the Company will exercise due diligence with its suppliers consistent with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas. In addition, the Company Policy provides that the Company will communicate to its suppliers its expectation that the suppliers commit to sourcing only from conflict-free smelters. Under the Company Policy, each Company supplier is required to provide completed Conflict-Free Sourcing Initiative ("CFSI") Conflict Minerals Reporting Template (the "Template") declarations. The Company Policy is available at www.fortive.com under the heading "Investors" and sub-heading "Corporate Governance."
- Step 1B: Internal Management Structure. The Company has implemented an internal management structure to execute the RCOI and due diligence process. The structure consists of a member of Company senior management with overall responsibility for the RCOI and the due diligence process; a member of the Company's corporate procurement department with dedicated responsibility for the design and execution of the RCOI and due diligence process; and an appointed employee at each of the Company's operating companies with responsibility for discharging the operating company's responsibilities in connection with the RCOI and due diligence process.
- Step 1C: Design of Supplier Engagement Process. The Company implemented a process to collect required supplier and smelter RCOI and due diligence data. Details on the supply chain data gathering process is provided below.
- Step 1D: Strengthen Company Engagement With Suppliers. The Company directly engaged suppliers as further discussed below.
- Step 1E: Grievance Mechanism. The Company has established a dedicated channel that provides a mechanism to report violations of our policies or other concerns by contacting conflictminerals@fortive.com.

The Company designed its supplier due diligence process to identify the smelters in the Company's supply chain in accordance with Step 2A of the OECD Guidance. The Company's supplier due diligence process included the following:

- The Company contacted suppliers and requested the name and contact details for the person responsible for the supplier's Conflict Minerals compliance.
- The Company emailed to each such supplier contact a copy of the Company Policy and a link to the Template and requested that such supplier return to the Company a completed Template with respect to all components and materials that such supplier provides to the Company.
- As necessary, the Company educated suppliers regarding the reasons for requesting the Conflict Minerals data and answered supplier questions relating thereto.
- The Company followed up with the suppliers that did not respond to the Company's initial outreach, and also followed up with suppliers who submitted data that appeared to be incomplete or incorrect.
- The Company amalgamated supplier provided smelters into a single unique list of smelters.

Some of the Company's suppliers were unable to identify the smelters or countries of origin in their supply chain, some suppliers responded by providing information related to all of the items the supplier produces without identifying smelters specific to the items purchased by the Company, and some suppliers included names of smelters that we believe may have been misidentified as smelters or that are not operational. The Company followed up with the suppliers that did not respond to the Company's initial outreach, and also followed up with suppliers who submitted data in the Template that appeared to be incomplete or incorrect.

With respect to each smelter identified by the Company's supply chain that declared directly or through their relevant industry association that they did not source from the Covered Countries, and were not recognized as conflict free by the CFSI's Conflict Free Smelter Program ("CFSP"), the Company, with the assistance of an outside consultant, reviewed publicly available information to determine if there was any contrary evidence to the smelter's declaration. With respect to each smelter identified by the Company's supply chain that is sourcing from or as to which there is reason to believe may be sourcing from the Covered Countries, the Company did not audit such smelters but instead relied on the CFSP, and if the smelter has not been audited and recognized as conflict free by the CFSP, the Company conducted risk mitigation on the smelter according to Step 3B of the OECD Guidance.

The Company's internal team supporting the Company's compliance with the Company Policy and the applicable regulations consolidated such data provided by the Company's suppliers, as well as the findings from the Company's outside consultant, for periodic reporting to the Company's senior management. In addition, during the due diligence process, the Company identified the applicable risks associated with our supply chain relating to Conflict Minerals for mitigation as discussed below under "Risk Mitigation and Due Diligence Improvement."

Annual Report on Supply Chain Due Diligence

In accordance with Step 5 of the OECD Guidance, this Conflict Minerals Report has been filed with the U.S. Securities and Exchange Commission. The Conflict Minerals Report is also available at www.fortive.com (under the heading “Investors”).

Results of Due Diligence

The responses provided by the Company’s suppliers resulted in the identification of 312 unique smelters identified in Annex I to this report. The Company determined that 35 of these smelters, as identified in Annex II to this report, source, or there is reason to believe that they source, from the Covered Countries. The Company further determined that 34 of these 35 smelters have been audited and recognized as conflict free by the CFSP, with the remaining smelter currently active in, but not recognized as conflict free by, the CFSP. The Company, with the assistance of our outside consultant, conducted risk mitigation with respect to such remaining smelter in accordance with Step 3B of the OECD Guidance, including performing additional due diligence to determine if there was any reason to believe such smelter directly or indirectly finances or benefits armed groups in the Covered Countries.

Due to the lack of detail provided by the suppliers, the Company was unable to confirm that the necessary Conflict Minerals in its products were processed by any particular smelter or smelters and is, therefore, unable to identify the processing facilities, country of origin or mine or location of origin of such Conflict Minerals.

Risk Mitigation and Due Diligence Improvement

The Company expects to take the following steps to improve its due diligence measures and to further mitigate the risk that the necessary Conflict Minerals contained in the Company’s products finance or benefit armed groups in the Covered Countries:

- continuing to seek to include in new supplier contracts a commitment by the supplier to take steps necessary to (a) enable the Company to comply with the Rule, and (b) with respect to smelters in Fortive’s supply chain that source from the Covered Countries, source only from smelters that have obtained a “conflict-free” designation from an independent, third-party auditor; and
- continuing to engage with suppliers to improve the accuracy and completeness of the information provided to the Company about the Company’s supply chain.

Cautionary Statement about Forward-Looking Statements

Certain statements included in this report are “forward-looking statements” within the meaning of the United States federal securities laws. All statements other than historical factual information are forward-looking statements. Forward-looking statements are based on assumptions and assessments made by our management in light of their experience and perceptions of historical trends, current conditions, expected future developments and other factors they believe to be appropriate. Forward-looking statements regarding due diligence improvements and risk mitigation are not guarantees of future performance; actual results may differ materially from the expectations contemplated by our forward-looking statements, and you should not place undue reliance on any such forward-looking statements. Information regarding the factors that may cause actual results to differ materially from these forward-looking statements is available in our SEC filings, including our 2016 Annual Report on Form 10-K. These forward-looking statements speak only as of the date of this report and the Company does not assume any obligation to update or revise any forward-looking statement, whether as a result of new information, future events and developments or otherwise.
